PREAMBULE

editorial

For over 40 years, Candide has been offering refined collections and innovative new products every year.

Exclusively dedicated to the baby universe, to their comfort, to mothers, and to the well-being of parents, Candide products provide the assurance of unique expertise combining authenticity, quality, and safety.

With the help of early childhood professionals, our childcare specialists remain attentive to parents, future parents, and emerging trends in order to imagine the best and most beautiful ways to welcome baby.

Candide, the mattress specialist

The story of our mattresses begins in our design office, just a few steps away from the workshop. The development team creates new designs by keeping up with the latest trends, standards, and the needs of our babies, with a single goal: to offer them quality sleep.

The adventure continues in our workshop, where we carefully produce the mattresses: high-resilience foam, viscoelastic foam, coconut fibers and latex, blocks of recycled cotton fibers, cotton covers, viscose, aloe vera...

So that baby can enjoy French-style comfort!

Most of our mattresses are made in France.

We master every stage of their creation, from design to production. They undergo continuous testing to guarantee consistent quality.

SKIN-TO-SKIN BAND

Using the skin-to-skin band promotes bonding from birth while keeping your hands free. It allows for quick and secure placement of the newborn in a prone position, while supporting temperature regulation, breathing, and overall baby well-being. Adaptable, it can also be used during pregnancy as a support band, providing comfort and belly support. Available in solid beige or grid print, the skin-to-skin band is a maternity essential—perfect as a birth gift or as part of a newborn and post-partum product selection.

BLACK & WHITE MOTOR SKILLS PLAYMAT

Featuring its high-contrast Black & White design, this mat is perfect for stimulating baby's vision from the very first days. Inspired by the Montessori method, it respects newborns' visual abilities, as their eyesight is still blurry at birth. This 3-in-1 mat provides a large, comfortable surface for play, rest, or lying down, while supporting baby's sensory and motor development.

At birth, a baby's vision is still very limited; everything is blurry, with only about 5% of an adult's visual acuity. Newborns cannot see clearly and do not yet perceive colors. They can detect shapes, light, and motion only within a grayscale palette. The high-contrast black and white design encourages cognitive development, gross motor skills, and stimulates baby during their early learning journey. Black and white images and patterns therefore have a real impact on supporting baby's sensory development.

BLACK & WHITE XL MOTOR SKILLS PLAYMAT

Designed to gently stimulate baby, the 5-in-1 play gym comes in a high-contrast Black & White pattern, suitable for newborn vision. Inspired by the Montessori method, it supports baby in all activities: extra-large play mat, tunnel, tent, reading and relaxation corner, or nap space. A fun, adaptable, and stimulating area that promotes comfort, curiosity, and visual development.
